TITLE : METHOD FOR CARRYING OR
STORING GLASS BASE MATERIAL

ABSTRACT : PROBLEM TO BE SOLVED: To smoothly package and unseal a glass base material, to prevent foreign matters from adhering to the glass base material during the carriage, and to immediately start the next work after the glass base material is taken out of a packaging material.

SOLUTION: A surface of a glass base material W is cleaned with alcohol and dried, and packaged with a bag-like or a sheet-like non-rigid plastic film F of 0.01-0.2 mm in thickness, and then, open parts such as an opening part are sealed by a heat seal or other method, the glass base material W packaged with the soft plastic film F is stored in a container through a cushioning material, and carried or stored.
